Laboratory

Laboratory of Social Neural Networks, Young Lab East, Faculty of Human Sciences, University of Tsukuba

Research field and overview

Our unit was initiated this year and we aim to understand the molecular and neural circuit mechanisms underlying social behaviors especially pair-bonding behavior. This will provide critical insights into social impairments observed in psychiatric disorders such as autism spectrum disorder, schizophrenia and bipolar disorder. Please refer our website as follows: https://socialneuralnetworks.wixsite.com/qq-lab

Job title, available positions and job description

Job title, available positions

Technical Staff (Part-time) 1 position

Job description

We are seeking an experienced and enthusiastic Technical Staff to support and advance our work investigating the molecular/neural circuit mechanisms of social behavior in mammals. The qualified candidates will have a demonstrable proficiency in one or more standard techniques indicated as follows: molecular biology, histology, electrophysiology, or behavioral analysis. Prior experience in rodent stereotaxic surgery would be a plus but not mandatory.

Qualifications

Minimum qualifications is a BS degree in Life Science and >1 years experience in a research laboratory.

Work location

Room 324, Research Building D, University of Tsukuba, 1-1-1Tennodai, Tsukuba, Ibaraki, JAPAN

Working time

4-5 days/week, 9:00am-5:15pm, maximum 35hours/week, details are negotiable,

Salary and benefits

1. 850～1,130/hour (based on experience)
2. Transportation will be covered
3. Social insurance, employment insurance and compensation insurance will be covered

Application and required documents

Required documents

① Resume (attached photo, any format is OK)

   * If you have an e-mail address, please enter your address.

② Career background (job experience, any format is OK)

How to apply

Send the application by email to Dr. Qi Zhang at zhangqi@human.tsukuba.ac.jp

Deadline

Open until the position is filled

Handling personal data

Submitted documents are strictly protected under the University Privacy Policy and will be used only for the purpose of applicant screening. Personal information will not be disclosed, transferred or loaned to a third party under any circumstances without just cause.

Selection process

Application screening and interview for selected applicants

Start employment

As early as possible
