

University Spin-offs (As of May 1, 2008) (Excluding those with closed operations, etc)

No	Company Name	Main products or services
1	Fluency Laboratories, Inc.	Research and development of software and system based on Fluency theory
2	IGEL Co., Ltd. http://www.igel.co.jp	Consulting of integrated Linux, consulting of international standardization, etc.
3	Tsukuba Brains Corporation http://www.t-brains.com	Umbilical cord blood bank for individuals (cryogenic preservation)
4	MRTechnology, Inc. http://www.mrtechnology.co.jp	Designing, manufacturing, and selling portable MRI technology
5	EnBioTec Laboratories Co., Ltd. http://www.enbiotec.co.jp	Creating new products and technologies that solve environmental issues by integrating biotechnologies with state-of-the-art technologies including sensor technology and IT
6	Marketing Excellence http://www.marketingex.com	Consulting
7	Microphase Co., Ltd. http://www.microphase.jp	Carbon nanotube composite equipments, fuel cell development
8	MEDIASTICK, INC. http://www.mediastick.co.jp	Developing information media, service networks, security services
9	Wise and Technology Co., Ltd. http://www.wizz-tech.co.jp	Software development, hardware manufacturing and development
10	Youworks Corporation http://www.youworks.jp	Fruit and vegetable traceability services, entrusted software development, developing and selling bio-imaging software
11	Logosware Corporation http://www.logosware.com	Creation of e-learning contents and system development, development of web communications systems, etc.
12	Cell-Medicine, Inc. http://www.cell-medicine.com	Development of medical treatments against cancer
13	Applied Cell Biotechnologies, Inc. http://www.acbio.co.jp	Providing customized medical and esthetic services using autologous cells
14	Information Infrastructure Laboratory, Inc. http://www.iil-inc.com	Developing software that allows the smooth rendering of images and sounds
15	Clear Stream Japan http://www.csj.join-us.jp	Teaching junior athletes through coaching and practical experiences
16	Iwashiy Bio-Science Co., Ltd.	Design, production and sale of equipments for microorganism cultures and equipments for food analysis
17	HID Inc. http://www.hid-fitness.com	Researching, developing, manufacturing and marketing health and nutritional products, medical products, and medicated cosmetics that use natural ingredients such as herbs and plants along with researching, developing, and implementing exercise therapies
18	Tsukahara Bokujou Co. Ltd. http://www.meishanton.com	Production, processing and sale of pork meat based on new standard sale methods that take into consideration the environmental preservation
19	Tsukuba Wellness Research Co., Ltd. http://www.twr.jp	Planning and implementing health management programs for middle aged and elderly people
20	MCBI Inc. http://www.mcbi.co.jp	Support of personalized health and medical treatment (development, production and sale of illness condition evaluation systems and in-vitro diagnostic systems, and support of personalized health and medical treatment using databases), etc.
21	Tsukuba Technology Seed Inc.	Supporting and mediating the commercialization of research results of universities and research institutes
22	Tsukuba Secure Network Research Co. Ltd. http://www.tsnr.com	Contracting, consulting and systems development of computer maintenance and operations with a focus on security
23	TECHREVO Inc. http://www.techrevo.com	Web design, web applications, autonomous server web hosting, consulting, media creation (CD, DVD, VHS), planning, creating and selling video programming, etc.
24	SoftEther Corporation http://www.softether.com/jp	Developing and providing technical support for virtual private network (VPN) software (Packetix VPN 2.0) along with developing and providing software and services in other fields
25	Research Institute of Tsukuba Biotech Ltd. http://www.maekawabio.org	Development and utilization of biomass conversion substances of biological resources
26	Placemaking Research Institute http://www.placemaking.jp	Managing events and planning using the concept of space design, urban management research and design
27	Nano Beam Co., Ltd http://nano-beam.com	Research and development of the light sources needed for semiconductor microfabrication
28	Sun Care Fuels Corporation http://www.suncarefuels.com	Research and development of biodiesel, emission credits and additive and consulting business
29	CYBERDYNE Inc. http://www.cyberdyne.jp	Research and development of robotic suits that can enhance physical abilities (medical and welfare equipments and systems)
30	GSSM Tsukuba	Developing, maintaining, selling, renting and consulting computer software.
31	Kotohaco, Inc. http://www.kotoha.co.jp	Developing a natural language "similar search" engine, developing and operating search media for cellular phones
32	ArkEngine Co., Ltd. http://www.arkengine.co.jp	Analysis of financial market and securities, marketing analysis, surveys, improvement of management efficiency through mathematical methods
33	New Forestar Corporation http://www.newforestar.com	Research and development of software, internet information services, mail-order business, etc.

No	Company Name	Main products or services
34	Football Club of Tsukuba http://tsukuba-fc.com/	Management of the Futsal Arena and supply of systems of sport club member administration
35	Japan Biomass Corporation http://www.j-biomass.com	Research and development of concentrated waste liquid treatment and waste treatment agents
36	THF Co., Ltd. http://thfweb.jp	Health consulting systems based on weight loss and physical independence support
37	Tsukuba Psychological Science Laboratory	Development of psychological examination systems using computer networks, consulting and product development for healthcare based on psychological examination results, consulting for personnel management
38	Tsukuba Research Institute, Co. Ltd. (TRI)	Consulting on business analysis and IT efficiency diagnostic, support for work restructuring and system introduction support, system inspection, security diagnostic and system management improvement
39	Somnonics, Co. Ltd.	Planning and development of screening systems for Sleep Apnea Syndrome, and carrying out Sleep Apnea Syndrome screenings
40	Arenabio, Co. Ltd. http://www.arenabio.com	Entrusted bioassay using human cells, research and development of new types of bioassay, research and development of new biologically active agents, obtaining the pertaining rights and form joint ventures
41	Enzyme Micro-biosensor Research and Development, LLP	Research and development of micro-biosensors, research, development, production, sale, licensing-out and consulting of enzymes sensors
42	Tsukuba Sport Intelligence, Co. Ltd. http://www.tsport-i.jp/	Development of goods related to sports, physical education and health science, sports clinic for professionals and amateurs, consulting and management of sports events
43	Medical Interface Corporation http://www.med-if.com	Creation of vital sensing systems, network administration systems and biosecurity services
44	Dance Association Seeds (DAS) http://www.das.e-tsukuba.jp/index.htm	Administration and management of dance studios, training of dance instructors, development of dance lesson methods
45	TechTech, Inc. http://techte.ch	Development, agent service and consulting of web service and software
46	Green Energy http://www.g-energy.co.jp	Research, development and sale of energy devices
47	Visible Intelligence Co., Ltd. http://www.visiblei.com	Internet advertising, design, development and production of merchandize sales systems etc.
48	WELCON Inc. http://www.welcon.co.jp/	Entrusted manufacturing of diffusion bonding, development support for products using precision diffusion bonding, development and sale of devices such as micro heat exchangers, micro reactors, production and sale of diffusion bonding equipments
49	Signal Design, LLC	Wireless technology (signal design technology for highly efficient use of radio frequency resources for mobile communication)
50	Education Design Lab http://www.educationdesign.jp	Scientifically based teaching materials and home education programs making use of research results of interpersonal communication (social skills training) Support services for the introduction of 'NetCommons', a Contents Management System (CMS) for educational institutions developed by the National Institute of Informatics (NII)
51	Laughwell, Co. Ltd. http://www.laughwell.co.jp	Support services for health-maintenance programs using the Internet or through direct communication, and sale of health-related products
52	Jubei Inc. http://jubei.co.jp	Computer software development, web database system development, Internet service provider
53	Air Eau Co., Ltd. http://aireau-microbubble.com	Research and development of environment-friendly products (related to air and water) using a micro bubble generator developed by the University of Tsukuba, and to contribute to the creation of a recycling society
54	Tsukuba GeneTechnology Laboratories Inc. http://www.tsukuba-genetech.com/	Gene appearance analysis business of plants and animals including human
55	Enzyme sensor Inc.	Development, manufacturing, sales of microorganism enzyme, development, manufacturing, sales of various enzyme sensors, and development of anti-cancerous enzyme medicine
56	Mobile Robot Research Inc.	Planning and development of mobile robot which works at disaster and consultant concerning an application of robot technology
57	New Energy Research Institute Inc. http://www.ne-ri.jp/	Development, sales and consulting of new energy related equipment
58	Tsukuba Materials Research Co., Ltd. http://www.tsukuba-mr.com/	Evaluation business of material using positron disappearance method Business on x rays optical element and x rays microscope
59	Voiser Inc. http://www.voiser.co.jp/	Research and development of software that centers on multimedia information technology Palnning, design and development of solution using information technology
60	MDD Creative Co., Ltd. http://www.mdd-creative.com	Reseach and development, manufacturing, operations, maintenance, sales, and export of software and hardware for information system, artificial intelligence system and 3D computer graphics
61	Biotechnology Clear System Tsukuba Research Co., Ltd. http://www.bcst.co.jp	Development, manufacturing, and sales of water clarification system, consulting of water regime, development and sales of materials for environmental cleanup, development and sales of health - promoting equipment, waste and recycling business

indicates the companies started by students.
