Doctoral Program in Life Sciences and Bioengineering, Graduate School of Life and Environmental Sciences

[Guidelines and Requirements] International Agricultural Sciences Program

Biochemistry of Biology Structural Biochemistry Molecular and Developmental Biology Biology for Gene Regulation Molecular Microbial Bioengineering Biochemistry of Plant Proteins Animal Bioresource Engineering Biochemistry of Plant Proteins Animal Bioresource Engineering Bioprocess Engineering Bioraction Engineering Bioraction Engineering Bioraction Engineering Call Cultivation Engineering Biomimetic Chemistry Engineering for Application of Biological Functions Field Engineering for Application of Biological Eucotions Field Engineering for Application of Biological Eucotions Field Engineering for Application of Biological Eucotion Engineering Good Chemistry Molecular Application of Biological Functions Field Engineering for Application of Biological Eucotions Field Engineering for Application of Biological Eucotions Field Engineering for Application of Biological Molecular Microbiology Molecular Application of Biological Eucotions Field Engineering for Application of Biological Molecular Microbiology Molecular Pergineering of Microbial Ecosystems Evolutionary Biology of Symbiosis Food Molecular Engineering Fungal Interaction and Molecular Biology	Course designation		Course group	Course name or conditions	Required credits
Animal Bioresource Engineering Bioprocess Engineering Bioreaction Engineering Applied Microbiology Cell Cultivation Engineering Biomimetic Chemistry Ecological Molecular Microbiology Functional Foods and Food Chemistry Molecular and Cellular Chronobiology Applied Bioengineering of Molecular Neurobiology Applied Bioengineering of Molecular Neurobiology Applied Bioengineering of Microbial Ecosystems Evolutionary Biology of Symbiosis Food Molecular Engineering	Specialized	Engineering for Application of Biological Functions Field	Genomic Biology Structural Biochemistry Molecular and Developmental Biology Biology for Gene Regulation Molecular Microbial Bioengineering	(3 credits) in the course are compulsory and required to	
Specialized courses Bioreaction Engineering Applied Microbiology Cell Cultivation Engineering Biomimetic Chemistry Ecological Molecular Microbiology Functional Foods and Food Chemistry Molecular and Cellular Chronobiology Applied Bioengineering of Microbial Ecosystems Evolutionary Biology of Symbiosis Food Molecular Engineering "Dissertation II", "Dissertation III", and "Dissertation III" (3 credits) in the course are compulsory and required to earn the credits. "Dissertation II", and "Dissertation III" (3 credits) in the course are compulsory and required to earn the credits. "Dissertation II", "Dissertation II", and "Dissertation III" (3 credits) in the course are compulsory and required to earn the credits.					
Fungal Interaction and Molecular Biology			Bioreaction Engineering Applied Microbiology Cell Cultivation Engineering Biomimetic Chemistry Ecological Molecular Microbiology Functional Foods and Food Chemistry Molecular and Cellular Chronobiology Molecular Neurobiology Applied Bioengineering of Microbial Ecosystems Evolutionary Biology of Symbiosis		
			Fungal Interaction and Molecular Biology		

[•]The graduate students of this program are required some credits with the recommendation of the advisory committee.

[•]Submission of the Doctoral Thesis and fulfilment of all the requirement for Doctoral Degree including successful passing of the final oral examination.

生命環境科学研究科 生物機能科学専攻(博士後期課程)

【履修方法・修了要件】 国際農業科学プログラム

科目区分		科目群	条件又は科目名等	修得単位数
専門科目		生体成分化学分野		各1単位
	生命機能情報工学領域	ゲノム情報生物学分野		
		構造生物化学分野	各自の専門分野の講究Ⅰ、Ⅱ及びⅢ	
		分子発生制御学分野		
		生体情報制御学分野		
		微生物育種工学分野		
		植物機能高分子科学分野		
		動物リソース工学分野		
		生物プロセス工学分野		
		生物反応工学分野		
		微生物機能利用学分野		
	生物機能利用工学領域	細胞機能開発工学分野		
		生体模倣化学分野		
		負荷適応微生物学分野		
		食品機能化学分野		
		時間細胞生物学分野		
		機能性神経素子工学分野		
		複合生物系利用工学分野		
		共生進化生物学分野		
		食品分子認識工学分野		
		糸状菌相互応答学分野		
			修了単位数	3

アドバイサリー・コミティーが指定する前期課程の科目がある場合にはそれを履修すること。

[・]博士論文及び修了要件を満たすこと、審査及び最終試験に合格すること。
