

Requirements for Program Completion

Graduate School of Comprehensive Human Sciences, Degree Programs in Comprehensive Human Sciences (Doctoral Program)

Doctoral Program in Nursing Science

【Requirements for Program Completion】For students admitted in 2023

		Nursing Science	
Subject area	Group of subjects	Condition or subject name, etc.	Number of credits earned
Subjects related to Nursing Science	Foundation Subjects for Major	Required (subject) "Foundations and Principles of Nursing Science" (2 credits), "Advanced Research Methods in Nursing Science" (2 credits)	10 credits or more
		At least 6 credits from "Advanced Nursing Education", "Application of Statistics in Nursing Research", Graduate General Education courses, and Inter-disciplinary Foundation Courses	
	Major Subjects	15 credits of specialized courses related to nursing science	15 credits
		Number of credits completed	25 credits or more

【Graduation requirements】

Students must be enrolled in the program for at least three years, earn the prescribed credits by completing the coursework required for completion as stipulated by Doctoral Program in Nursing Science, receive the necessary research guidance, and pass the doctoral dissertation review and final examination. However, it is sufficient for those who have achieved excellent research results to be enrolled for at least one year (three years including the period of enrollment in the relevant process in the case of those who have completed their master's degree early, etc.).

*When deemed educationally beneficial, credits earned by taking courses in other degree programs may be accepted as credits toward completion, within the limits specified for each degree program.
