#### **Purpose**

**Article 1:** The purpose of these Departmental Specific Regulations shall be to define matters related to human resource development and other education and research purpose (referred to in Article 1-2 as “purposes of human resource development”) and the structure of the academic curriculum and requirements for completing courses at the School of Social and International Studies (hereinafter referred to as “the School”) in accordance with the provisions of Article 1-2, paragraph (1) , Article 25, paragraph (1), Article 25-2, paragraph (2), Article 28, paragraph (1), Article 31, paragraph (1), Article 33, Article 35, paragraph (3), Article 39 and Article 40 of the Specific Regulations of the University of Tsukuba (Specific Regulations No. 10 of 2004, hereinafter referred to as “The Undergraduate School Regulations”).

#### **Purposes of Human Resource Development**

**Article 1-2:** According to Article 1-2, paragraph (1) of the Undergraduate School Regulations, the School aims to encourage students to study in detail various topics of contemporary society on a global scale, as well as to analyze complex situations and concrete problems to meet the demands of our society.

(2) Purposes of human resource development shall be as follows.

Colleges	Purposes of Human Resource Development
Social Sciences	The College of Social Sciences provides interdisciplinary education in the fields of sociology, law, political science and economics. Students may gain a fundamental understanding in each field, and also develop specialist knowledge and skills. We encourage students to become highly skilled Glocal (understanding both global and local considerations) professionals who have a fundamental understanding of the social sciences.
International Studies	In globalization, more complex international issues have been arising. The college cultivates students to develop deep insights into the essence of such issues, master information technology and to learn analysis skills. We aim to educate students who can become actively involved on the international stage with the vision and assertiveness to propose unique solutions to others.

### Main Field of Study

**Article 2:** Main fields set forth in the provisions of Article 25, paragraph (1) of The Undergraduate School Regulations shall be as follows.

Colleges	Main Fields
Social Sciences	Sociology, Law, Political Science, Economics

### **Purpose**

**Article 1:** The purpose of these Detailed Division Regulations is to define matters related to human resource development and other education and research purposes (referred to in Article 1-2 as “purposes of human resource development”) and the construction of the academic curriculum and matters necessary for the completion of courses in the School of Life and Environmental Sciences (in accordance with the provisions of Article 1-2, paragraph [1], Article 25, Article 28, Article 31, Article 33, Article 35, paragraph [3], Article 39 and Article 40 of University of Tsukuba Undergraduate School Rules [Specific Regulations No. 10 of 2004, hereafter referred to as “Undergraduate School Rules”]).

### **Objective: Cultivation of Human Resource Development**

**Article 1-2:** According to Article 1-2, paragraph [1] of the Undergraduate School Rules, the purpose of the School of Life and Environmental Sciences is to foster graduates with the skills and outlook required to become future global leaders, and a strong capacity to discover and solve problems. Students develop a comprehensive understanding of biological phenomena of various organisms including humans, the evolution of the earth and dynamics of the environment, and methods of conservation and sustainable use of biological resources.

(2) The purposes of human resource development set by the respective Colleges shall be as follows;

Colleges	Purposes of Human Resource Development and of Education and Research
College of Biological Sciences	The College of Biological Sciences aims to provide students with a wide scope of knowledge about the systems of life and the mechanisms of biological functions, and to help them understand the essence of life phenomena and the importance of advanced research. In this way, students are guided to become active as researchers, educators, technicians, employers, and persons who will be a point of contact between advanced science and society in diverse fields of biological sciences.
College of Agro-Biological Resource Sciences	The College of Agro-Biological Resource Sciences aims to provide comprehensive knowledge about the effective use of plants, animals and microorganisms for safe and comfortable human life, and to nurture students who can contribute the local and global issues such as food security and environmental conservation, through development and sustainable use of biological resources.
College of Geoscience	Geoscience addresses issues relating to the evolution of the Earth, the natural processes on the Earth's surface, in the Earth's atmosphere, lithosphere, hydrosphere, and the interactions between natural environments and human activities. The aim of our education is to help students acquire profound knowledge of and comprehensive insight into the planet earth. Our program covers a wide variety of subjects, and encourages students to seek their carriers in academia, education, and governments, as well as in companies.

### Main Fields of Study

**Article 2:** The Major fields set forth in the provisions of Article 25 of the Undergraduate School Regulations shall be as follows.

Colleges	Main Fields
Biological Sciences	Biology
Agro-Biological Resource Sciences	Agro-Biological Resource Science, Agricultural Science
Geoscience	Geoenvironmental Sciences, Earth Evolution Sciences

(2) In addition what is prescribed in Article 2, paragraph [1], majors for “Interdisciplinary Program in Life and Environmental Sciences” shall be set up in each college.

### Completion of Courses, etc.

**Article 3:** Courses and the number of credits, etc. required for graduation from *Major Subjects*, *Foundation Subjects for Major*, and *General Foundation Subjects* for each main field for the School of Life and Environmental Sciences set forth in provisions of Article 39, paragraph [1], shall be described in Appended Table No. 1. For the main fields of “Interdisciplinary Program in Life and Environmental Sciences,” in each College, courses and number of credits, etc. required for graduation shall be described

in Appended Table No. 2.

(2) With regard to the College of Geoscience, subjects and the number of credits required prior to selecting from the Main fields set forth in the Article 2, paragraph [1] shall be described in Appended Table No. 3.

### Sub Fields of Study

**Article 4:** When selecting the sub fields of study, according to Article 2, the Dean can accept and register one subject among other schools main fields.

(2) With regard to the College of Geoscience Sub fields of study authorized terms and conditions shall be described in Appended Table No. 4.

### Maximum Limit for Course Registration

**Article 5:** The maximum limit per academic year shall be 45 credits (In accordance with Article 33, paragraph [1] of the Undergraduate School Rules).

(2) In case of the preceding paragraph, courses related to teacher’s license, courses related to museum, and intensive courses offered during summer, winter, and spring recesses shall be excluded.

(3) Requirements and number of credits in the case of approval for exceeding the maximum limit in accordance with Article 33, paragraph [2] of the Undergraduate School Rules shall be as in the following table.

Colleges	Requirements	Number of Credits
Biological Sciences	(1) Students who have earned at least 40 credits (20 credits for first year students who were admitted to the University in September or October) of the credits required for graduation in the previous year, and their total credits of grades “A+,” “A” and “B” cover 70 percent or more of the above credits.  (2) In the case of first year students, students who are approved to have special circumstances by the Chair of the College.	55 credits
Agro-Biological Resource Sciences	(1) Students who have earned at least 40 credits (22 credits for first year students who were admitted to the University in September or October) of the credits required for graduation in the previous year, and their total credits of “A+” and “A” cover 80 percent or more of the above credits.  (2) Students who are approved to have special circumstances by the Chair of the College.	55 credits
Geoscience	(1) Students who have earned at least 40 credits (20 credits for first year students who were admitted to the University in September or October) of the credits required for graduation in the previous year, and their total credits of “A+” and “A” cover 60 percent or more of the above credits.  (2) Students who are approved to have special circumstances by the Chair of the Colleges.	55 credits

## Grade Evaluation

**Article 6:** Grades of “P” or “F” (in accordance with Article 35, paragraph [3] of the Undergraduate School Rules) shall be given for the First Year Seminar, Japan-Expert First Year Seminar, Invitation to Arts and Sciences, Biology internship subjects, Class Seminar, Agro-Biological Resource Sciences internship subjects (except for Extension Course for Field Practices in Forests I), [Agro-Biological Resource Science, Practices EG40013] [Agro-Biological Resource Science, Exercises EG40012], Field Studies in Bioresource Science, Field Practices in Environmental Engineering, Special Practices in Biological Sciences for Agrobiology and Forestry, Seminar in Applied Biological Chemistry I, Seminar in Applied Biological Chemistry II, Field Studies in Forest Hydrology and Erosion Control Engineering, Bioproduction Machinery Practices, Advanced Computer Programming, Practice in Surveying Seminar in Economics and Sociology, and Geoscience (EE11512, EE11522, EE11532).

(2) Classes shown in the following table shall be excluded from the calculation of the semester GPA and cumulative GPA in the GPA grading system of the school.

Colleges	Classes to be excluded from the calculation of the semester GPA and cumulative GPA in the GPA grading system
Biological Sciences	No subject is excluded
Agro-Biological Resource Sciences	No subject is excluded
Geoscience	Specific Foundation Subjects in General Foundation Subjects

## Early Graduation

**Article 7:** Eligibility for early graduation and graduation standards (In accordance with Article 40 of the Undergraduate School Rules) shall be as in the following table.

Colleges	Eligible Students	Graduation Standards
Biological Sciences	<p>(1) Students who have earned at least 95 credits of the credits required for graduation by the end of their second year, and their total credits of “A+,” “A” and “B” cover 90 percent or more of the above credits, and they shall be expected to be engaged in graduation research from the third year and to fulfill all graduation requirements by the end of the third year.</p> <p>(2) With regard to students who were admitted in September or October, students who have earned at least 100 of the credits required for graduation by the end of the fall semester of their third year, and their total credits of “A+,” “A” and “B” cover 60 percent or more of the above credits, and they are expected to be engaged in graduation research from the fourth year and to fulfill all graduation requirements by the end of the fourth year.</p>	<p>(1) Students who fulfill the College’s graduation requirements</p> <p>(2) Graduation research content is recognized as being excellent</p>

<p>Agro-Biological Resource Sciences</p>	<p>(1) Students who have earned at least 90 credits of the credits required for graduation by the end of their second year, and their total credits of “A+” and “A” cover 90 percent or more of the above credits.</p> <p>(2) With regard to students who were admitted in September or October, one of the following set of conditions applies:          ① Students who have earned at least 90 credits of the credits required for graduation by the end of the spring semester of their second year, and their total credits of “A+” and “A” cover 90 percent or more of the above credits.          ② Students who have earned at least 90 credits of the credits required for graduation by the end of the fall semester of their third year, and their total credits of “A+” and “A” cover 50 percent or more of the above credits.</p>	<p>Students who fulfill the College’s graduation requirements</p>
<p>Geoscience</p>	<p>(1) Students who have earned at least 95 credits of the credits required for graduation by the end of their second year, and their total credits of “A+” and “A” cover 90 percent or more of the above credits. Further, the above students shall be expected to be engaged in graduation research and to fulfill all of graduation requirements.</p> <p>(2) With regard to students who were admitted in September or October, students who have earned at least 100 of the required credits at the end of the fall semester of their third year, and their total credits of “A+” and ”A ”cover 50 percent or more of the above credits, and they are expected to be engaged in graduation research and to meet all graduation requirements by the end of the fall semester of their fourth year.</p>	<p>(1) Students who fulfill the College’s graduation requirements</p> <p>(2) Graduation research content is recognized as being excellent</p>

**Miscellaneous Regulations**

**Article 8:** In addition to the regulations prescribed in these Detailed Division Regulations, upon discussion in the Faculty Council, the Chair of each College shall determine the period for selection of a Major field, application period for early graduation, selection and submission periods for graduation research, and other necessary matters related to the completion of classes in the relevant college, which will be publicly noticed in the campus.

**Supplementary Provisions**

These Detailed Division Regulations shall go into effect from April 12, 2007 and shall be applied from April 1 of the same year.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of January 24, 2008)

1. These Detailed Division Regulations shall go into effect from April 1, 2008.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of January 22, 2009)

1. These Detailed Division Regulations shall go into effect from April 1, 2009.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of January 28, 2010)

1. These Detailed Division Regulations shall go into effect from April 1, 2010.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of March 10, 2011)

1. These Detailed Division Regulations shall go into effect from April 1, 2011.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of March 8, 2012)

1. These Detailed Division Regulations shall go into effect from April 1, 2012.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of February 22, 2013)

1. These Detailed Division Regulations shall go into effect from April 1, 2013.
2. Method for completion of subjects applied to students admitted to the University prior to

enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of June 27, 2013)

1. These Detailed Division Regulations shall go into effect from June 27 day, 2013 and shall be applied from April 1, 2013.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of March 7, 2014)

1. These Detailed Division Regulations shall go into effect from April 1, 2014.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of December 18, 2014)

1. These Detailed Division Regulations shall go into effect from April 1, 2015.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of June 25, 2015)

1. These Detailed Division Regulations shall go into effect from September 1, 2015.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of December 17, 2015)

1. These Detailed Division Regulations shall go into effect from April 1, 2016.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of August 22, 2016)

1. These Detailed Division Regulations shall go into effect from October 1, 2016.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of October 27, 2016)

1. These Detailed Division Regulations shall go into effect from November 1, 2016 and shall be applied from April 1, 2016.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions except for the revised article 7 of Specific Regulations for the School of Life and Environmental Sciences.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of January 27, 2017)

1. These Detailed Division Regulations shall go into effect from April 1, 2017.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of December 21, 2017)

1. These Detailed Division Regulations shall go into effect from April 1, 2018.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of June 28, 2018)

1. These Detailed Division Regulations shall go into effect from September 1, 2018.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of December 20, 2018)

1. These Detailed Division Regulations shall go into effect from April 1, 2019.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of February 28, 2019)

1. These Detailed Division Regulations shall go into effect from April 1, 2019.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of February 7, 2020)

1. These Detailed Division Regulations shall go into effect from April 1, 2020. However, the grading of "Invitation to Arts and Sciences" specified in Article 6, Paragraph 1 is applied from April 1, 2019.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of August 20, 2020)

1. These Detailed Division Regulations shall go into effect from September 1, 2020.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 1 of January 28, 2021)

1. These Detailed Division Regulations shall go into effect from April 1, 2021.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Life and Environmental Sciences No. 2 of December 2021)

1. These Detailed Division Regulations shall go into effect from April 1, 2022.
2. Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

Notes:

- The number of credits listed in the above table refers to the number of credits required for graduation. The number with 「\*」 indicates the maximum number of credits in the sections.
- The double-counting of the class is prohibited whether it is within the same subject category or across all subject categories.
- 「Science Communication」, 「Biology Seminar」, 「Graduation Research」, 「Fundamental Biology, Laboratory」 and the required 「Multidisciplinary Subjects」 must be taken following the indicated manner. With regard to the Multidisciplinary Subjects, Physical Education, and Art, students shall take the offered classes that are relevant to each subject.
- Foreign language in required subjects is Japanese in principle. Only when specifically approved, students can take Introductory Studies in Foreign Languages or English as required foreign language.
- Among courses selected from Major Subject Core Electives (EB15 - EB99), students are required to complete four or more laboratory or field courses, including at least one field course. Credits earned from Open Classes for the Marine Laboratory and Field Studies (a maximum of 1 class) are recognized as required credits for graduation.
- Graduation Thesis and Graduation Research classes prescribed in the provisions of Article 31 of The Undergraduate School Rules include Graduation Research, Methodology on Biology, Biology Seminar, Technical English BIII, and Technical English DI, DII, DIII.

#### Specific Regulations for the School of Science and Engineering, University of Tsukuba

##### Purpose

**Article 1:** The purpose of these Detailed Division Regulations shall be to define the goal of human resource development and of education and research (hereinafter referred to as “goal of human resource development”), as well as any necessary matters concerning curriculum design and its course registration in the School of Science and Engineering (in accordance with the provisions of Article 1-2, paragraph (1), Article 25, Article 25-2, Article 28, Article 31, Article 33, Article 35, paragraph (3), Article 39 and Article 40 of the University of Tsukuba Undergraduate School Rules [Detailed University Regulations No. 10 of 2004, hereinafter referred to as “The Undergraduate School Rules”] as well as the provision of Article 4 of Implementation Guidelines for the GPA System of the University of Tsukuba [decided at the forth Education Council of the Colleges in 2012. Hereafter referred to as “Implementation Guidelines”]).

##### Goal of Human Resource Development

**Article 1-2:** According to the Detailed Division Regulations provisioned in Article 1-2, paragraph (1) of the Undergraduate School Rules, the goal of human resource development set by the School of Science and Engineering shall be as follows:

The School of Science and Engineering aims to foster students to acquire a wide range of knowledge, necessary for the creation of a sustainable society, mainly through developing their expertise in the fields ranging from the basics to the applications in natural science and technology. The program nurtures students to have flexibility in thinking, to help them to develop intellectual creativity with problem findings and solving abilities. Thus, this program aims to the development of global human resources who can contribute to the global community through their wide overall vision, humanity and their skills of team-effort and so on.

**Paragraph 2:** According to the Detailed Division Regulations provisioned in the Article 1-2 paragraph (1) of the Undergraduate School Rules, the goal of human resource development set by the respective Colleges under the School of Science and Engineering shall be as follows.

Colleges	Goal of Human Resource Development
College of Mathematics	The College of Mathematics aims to provide students with a wide scope of knowledge about the basics of the modern mathematics ranging from pure to applied mathematics, and thus help them to attain a high level of logical skill and mathematical thinking ability to analyze and interpret any problems, and finally solve the problems. In this way, this college aims to

Colleges	Goal of Human Resource Development
	develop human resources to be capable to participate actively in the various fields of the society.
College of Physics	The College of Physics aims to foster students to acquire a solid foundation and a high level of specialized knowledge about the diversely developing modern physics, and to attain a flexible cognitive skill nurtured through the processes of questing the truth, in addition to a problem-solving skill by providing insight on the nature of things. Thus, this college aims to develop human resources who can play an active role in various fields of society by making use of their respective abilities.
College of Chemistry	The College of Chemistry aims to foster students to have enough fundamental knowledge about chemistry to be able to possess enthusiasm for exploring the universal law, unknown substances and phenomena in the nature, for the development of materials, creation of functional materials, solution of environment and energy problems, and elucidation of biological phenomena at the molecular level.
College of Engineering Sciences	The College of Engineering Sciences aims to foster students to become engineers and researchers possessing innovation and creativity, being expert in the cutting-edge technology will contribute to the sustainability and development of the society.
College of Engineering Systems	The College of Engineering Systems aims to foster students to become engineers and researchers who can support and drive safe and secure, comfortable and productive, and sustainable human life in terms of engineering; that is, 1. Those who have a basic capability to apply their abilities for a wide range of the engineering fields, 2. Those who have a broad perspective for accomplishing duties, 3. Those who have basic human abilities as a member of society and a professional person.
College of Policy and Planning Sciences	The College of Policy and Planning Sciences aims to foster students to develop a thinking ability necessary for integration of arts and sciences, and the ability for analyzing and utilizing data technologically, practically and strategically to analyze various social problems caused by complicated human behaviors.

### Main Fields

**Article 2:** Main fields set forth in the Detailed Division Regulations provisioned in the Article 25 of The Undergraduate School Rules shall be as follows.

Colleges	Main Fields
College of Mathematics	Mathematics
College of Physics	Physics
College of Chemistry	Chemistry
College of Engineering Sciences	Applied Physics, Quantum and Electronic Engineering, Applied Condensed Matter Physics, Materials and Molecular Engineering
College of Engineering Systems	Intelligent Engineering Systems, Engineering Mechanics and Energy
College of Policy and Planning Sciences	Social and Economic Sciences, Management Sciences and Engineering, Urban and Regional Planning

### Bachelor's Program in Interdisciplinary Engineering

**Article 2-2:** The School of Science and Engineering sets up Bachelor's Program in Interdisciplinary Engineering that provides interdisciplinary curriculum crossing the College of Engineering Sciences and the College of Engineering Systems.

**Paragraph 2:** The main field of Bachelor's Program in Interdisciplinary Engineering is interdisciplinary engineering.

**Paragraph 3:** In addition to what is described in the preceding paragraph 2, the goal of human resource development as well as any necessary matters concerning curriculum design and its course registration in Bachelor’s Program in Interdisciplinary Engineering shall be set up separately.

**Completion of Courses, etc.**

**Article 3:** The number of subjects and credits, required for graduation from each *Major Subject, Foundation Subject for Major,* and *General Foundation Subject* for each main field of the School of Science and Engineering, set forth in the Detailed Division Regulations provisioned in the Article 39, paragraph (1) of the Undergraduate School Rules, shall be described in Appended Table No. 1.

**Requirements for Main Field Selection**

**Article 4:** With regard to the selection of students’ major field for those who are in the College of Engineering Sciences, the College of Engineering Systems, and the College of Policy and Planning Sciences, the Dean of the school shall take into consideration of students’ requests, select their main major after the end of the academic year of their enrollment, and finally determine their main major after discussion with the Education Council of the College and the School Operation Committee for the School.

**Paragraph 2:** Subjects and credits to be acquired (hereafter referred to as “required subjects,”) prior to the selection of the main field shall be as described in the Supplementary Table No. 2 (not listed).

**Paragraph 3:** The Dean of the school may, when it deems to be effective, allow students to take a minor field which shall be selected from the main fields from a college concerned.

**Maximum Credits for Course Registration**

**Article 5:** The maximum credits allowed for course registration per academic year shall be 45 credits(excluding courses related to a teacher-training and curator certificate in addition to intensive courses offered during summer, winter, and spring recesses) as set forth in the Detailed Division Regulations provisioned in the Article 33, paragraph (1) of The Undergraduate School Rules.

**Paragraph 2:** Requirements and the number of credits to get approval for course registration over the maximum credits, set forth in the Detailed Division Regulations provisioned in the Article 33, paragraph (2) of The Undergraduate School Rules, shall be as in the following table.

Colleges	Requirements	Credits
College of Mathematics College of Physics College of Chemistry	(1) Students who have earned at least 80 % of the total credits required for graduation by the previous semester/ previous academic year. (2) At least 50% of the total credits earned from the major subjects in a college concerned by the previous semester/previous year, should have grades “A” or higher. Students who are recognized as excellent students by class teachers based on taking into consideration the above criteria (1) and (2).	60 credits (55 credits for freshmen)
College of Engineering Sciences	For the second year students and above, they have earned at least 26 credits out of the total credits required for graduation in the previous year and the credits have grades “A” or higher.	55 credits (However, for students who are approved with outstanding academic results, the dean of the college may consider the maximum limit for course registration. )
College of Engineering Systems	Students who have earned at least 40 credits out of the total credits required for graduation in the previous year, and 80% or more of these credits have grades “A” or higher, might be recognized as excellent students by the dean of the college	55 credits

College of Policy and Planning Sciences	Students who have earned at least 35 credits out of the total credits required for graduation in the previous year, and 80 percent or more of the above credits have grades “A” or higher	55 credits
---	---	------------

### Registration on the Interdisciplinary Fields other than the Major Fields

**Article 6:** If students wish to select an interdisciplinary field other than the main fields, the Dean of the School shall manage the decision upon discussion in the Education Council of the College and the School Operations Committee for the School.

### Grade Evaluation

**Article 7:** According to the Detailed Division Regulations provisioned in Article 35, paragraph (3) of the Undergraduate School Rules, the grades of “P” or “F” shall be given to the subjects, *the First Year Seminar, Invitation to Arts and Sciences, Introduction to Mathematics* provided by the College of Mathematics, *Study of Physics Basic Seminar I and II, Class Seminar I, Seminar for Topic Research Practice 1 and 2, Special Physics Seminar 1 & 2,* and *Introductory Physics* provided by the College of Physics as well as *Introduction to Chemistry* provided by the College of Chemistry.

**Paragraph 2:** According to the Article 4-2, paragraph 3 of the Implementation Guidelines, subjects appointed by the Dean of the School of Science and Engineering in the following table shall be excluded from GPA grading in semester and cumulative GPA of the GPA system of the school.

Colleges	Subjects to be excluded from GPA grading in the semester and cumulative GPA
College of Mathematics	1. Subjects provided by schools and colleges excluding College of Mathematics, College of Physics, College of Chemistry, College of Geoscience 2. Instruction method of the subjects in Mathematics
College of Physics	No subject is excluded
College of Chemistry	1. Subjects provided by schools and colleges excluding College of Mathematics, College of Physics, College of Chemistry, College of Geoscience 2. Instruction method of the subjects in Sciences
College of Engineering Sciences	Subjects related to teacher’s license and museums
College of Engineering Systems	No subject is excluded
College of Policy and Planning Sciences	No subject is excluded

### Early Graduation

**Article 8:** Eligible students for early graduation standards as set forth in the provisions of Article 40 of The Undergraduate School Rules shall be as described in the following table.

Colleges	Eligible Students	Graduation Standards
College of Mathematics College of Physics College of Chemistry	Students who have earned at least 100 credits out of the total credits required for graduation from the College of Mathematics and the College of Chemistry, and at least 95 credits out of the total credits required for graduation from the College of Physics by the end of the second year, and 90 percent or more of the above credits have grades “A” or higher. However, if students who are enrolled in the fall semester and wish to graduate six months earlier, they should have earned at least 100 credits out of the total credits required for graduation from the College of	(1) Students who have earned at least 80 percent or more of the credits required for graduation and these credits have grades “A” or higher. However, students who enrolled in the fall semester have earned at least 70 percent or more of the credits required for graduation, and these credits have grades “A” or higher. (2) Graduation research content is recognized as

College of Engineering Sciences	Students who have earned at least 85 credits out of the total credits required for graduation by the end of the second year, their total credits in the major subjects and foundation subjects for major with grade “A” or higher cover 85 percent or more of the above credits, and the dean of the college approves them to graduate from the college with consideration of these conditions. Each college may have an interview with students. However, with regard to students who are enrolled in the fall semester and expect to graduate in the fall of the fourth grade, the students have to earn at least 95 out of the total credits required for graduation with excellent grade and fulfill general requirements for registering the graduation research at the end of the fall semester of the third year. They also have to complete requirements for graduation by the end of the fall semester of the fourth year. Moreover, in principle, students should obtain all necessary credits in foundation subjects for major required for graduation at the time of moving up to the third grade.	(1) Students who have earned 85 percent or more of the credits required for graduation, and these credits have grades “A” or higher. (2) Students who have earned 85 percent or more of the credits from major subjects and foundation subjects for major required for graduation and these credits have grades “A” or higher. (3) Students who have acquired Special graduation research and its content is recognized as being excellent. However, for the students who enrolled in the fall semester and graduate in the fall of the fourth year, they must have to take the graduation research at the time of the spring semester of the fourth year, and meet the College’s graduation requirements and must have completed them with excellent grade by the fall semester of the fourth year.
College of Engineering Systems	Students who have earned at least 85 credits out of the total credits required for graduation by the end of the second year, and their total credits of “A” or higher cover 90 percent or more of the above credits, or their grades are within top 5 percent. In addition, the dean of the college might judge the following points to be considered for their graduation. a) Credits acquired are consistent for graduating from the College of Engineering Systems. b) The study plan for special graduation research is feasible. However, for students who admitted in the fall semester and expect to graduate in the fall semester of the fourth grade, they must complete graduate research with excellent grades and are expected to fulfill all graduation requirements by the end of the	Students who have been at a college over three years, have completed the Special Graduation Research A and B including a public presentation, and must meet requirements for graduation. However, students who enrolled in the fall semester and graduate in the fall semester of the fourth year, they must take the graduation research in the spring semester of the third year, and must have completed all requirements for graduation with excellent grades.

College of Policy and Planning Sciences	<p>(1) Students who have earned at least 85 credits of the credits out of the total credits required for graduation by the end of the second year, and the total credits of “A” or higher cover 85 percent or more of the above credits. However, students who are enrolled in the fall semester, must meet all necessary requirements set by each major field, and expected to complete graduation research with excellent grades.</p> <p>(2) Upon fulfilling above (1), students must obtain permission from their academic advisor for early graduation research or graduation research.</p>	<p>(1) Students must meet requirements for graduation excluding the graduation research.</p> <p>(2) Students must complete the early graduation research. However, students who enrolled in the fall semester and wish to graduate early, must take the graduation research by following the same schedule of the fourth-year students enrolled in the spring semester, and must meet the all requirements for graduation by the end of the fall semester of the fourth year.</p>
Bachelor’s program in Interdisciplinary Engineering	Students who have earned at least 70 credits out of the total credits required for graduation by the end of the second year have a GPA of 3.8 or higher, have a course plan that is deemed appropriate for early graduation and have been approved by the degree program leader and others after an individual interview.	Students who have been enrolled at the college for at least three and half years, have completed "Interdisciplinary Engineering PBL IV", and have met the requirements for graduation with excellent grades.

**Miscellaneous Regulations**

**Article 9:** In addition to the regulations prescribed in these Detailed Division Regulations, upon discussion in the Education Council of the College, the Dean of each College shall determine and notify the public of the period for selection of a major field, application period for early graduation, selection and submission periods for graduation research, and other necessary matters concerning the completion of classes in the relevant college.

**Supplementary Provisions**

These Detailed Division Regulations shall be implemented from April 25, 2007 and shall be applied from April 1, 2007.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of February 27, 2008)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2008.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of February 18, 2009)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2009.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 2 of October 28, 2009)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2010.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of March 5, 2010)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2010.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of March 4, 2011)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2011.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of March 8, 2012)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2012.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of March 8, 2013)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2013.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 2 of July 19, 2013)

- 1 These Detailed Division Regulations shall be implemented from July 19, 2013 and applied from April 1, 2013.
- 2 The matters related to the College of Science and Engineering as set forth in Article 7-2 of the revised Detailed Division Regulations of the School of Science and Engineering based on these Detailed Division Regulations shall be applied to a student who was admitted in or after the AY2013.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 22, 2014)

- 1 These Detailed Division Regulations shall be implemented from January 22, 2014 and applied from April 1, 2013.
- 2 The matters related to the College of Science and Engineering as set forth in Article 8 of the revised Detailed Division Regulations of the School of Science and Engineering based on these Detailed Division Regulations shall be applied to a student who was admitted in or after the AY2013.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 28, 2015)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2015.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 27, 2016)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2016.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 25, 2017)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2017.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 24, 2018)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2018.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No.3 of December 19, 2018)

- 1 These Detailed Division Regulations shall be implemented from September 1, 2019.
- 2 Method for completion of subjects applied to students admitted to the School of Science and Engineering prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 23, 2019)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2019.
- 2 Method for completion of subjects applied to students admitted to the School of Science and Engineering prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 22, 2020)

- 1 These Detailed Division Regulations shall go into effect from April 1, 2020. However, the grading of "Invitation to Arts and Sciences" specified in Article 7, Paragraph 1 is applied from April 1, 2019.
- 2 Method for completion of subjects applied to students admitted to the University prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of January 27, 2021)

- 1 These Detailed Division Regulations shall be implemented from April 1, 2021.
- 2 Method for completion of subjects applied to students admitted to the School of Science and Engineering prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 2 of June 14, 2021)

- 1 These Detailed Division Regulations shall be implemented from September 1, 2021.
- 2 Method for completion of subjects applied to students admitted to the School of Science and Engineering prior to enforcement of these Regulations shall be in accordance with the previous provisions.

**Supplementary Provisions** (Detailed Division Regulations for the School of Science and Engineering No. 1 of July 13, 2022)

- 1 These Detailed Division Regulations shall be implemented from September 1, 2022.
- 2 Method for completion of subjects applied to students admitted to the School of Science and Engineering prior to enforcement of these Regulations shall be in accordance with the previous provisions.

2. The credits of any course should not appear more than once in the above table.
3. Courses for Multidisciplinary Subjects, Physical Education, Foreign Languages, Fine Arts, and Information Literacy, shall be those that are specifically designated as such.
4. To engage in a series of PBL courses, the total number of credits earned should be at least 46, including the minimum of 30 from the Foundation Subjects for Major category.
5. The total number of credits for Core Electives should be at least 12, where the minimum of 9 credits should be taken from Group A in Major Subjects.

**(4) Specific Regulations for the School of Medicine and Health Sciences**

Specific Regulations for  
the School of Medicine and Medical Sciences  
No. 1 of April 1, 2007

Revised Specific Regulations for the School of Medicine and Medical Sciences No. 1 of 2012

(Purpose)

**Article 1:** Specific regulations outlined in this document were established for the School of Medicine and Medical Health Sciences to organize, define, and plan the human resource development, educational, and research policies (collectively referred to as human resource development hereafter). This regulation is established under the provisions of Article 1-2, paragraph (1), Article 25, paragraph (1), Article 25-2, paragraph (1), Article 28, paragraph (1), Article 31, paragraph (1), Article 35, paragraph (3) and Article 39, paragraph (1) of the Specific Regulations of the University of Tsukuba (Specific Regulations No. 10 of 2004, also referred to as "The Undergraduate Regulations."

(Objective: Cultivation of human resources)

**Article 1-2:** The aim of education in the School of Medicine and Medical Sciences is to train health professionals to develop not only the medical expertise but also the communication skills required for a holistic medicine and researchers in the field of medicine, nursing and medical sciences.

2 The objectives for cultivating human resources are as follows;

Colleges	Purpose Related to Cultivation of Human Resources and for Education and Research
Medicine	The College of Medicine aims to cultivate clinicians who have the fundamental clinical ability with communication skills and those who are able to practice medicine from the standpoint of patients. They should make great contributions to the various fields of health, medicine and welfare of our society.
Nursing	The College of Nursing aims to cultivate health professionals who understand medical needs of people in the rapid changes of our society and those who will be able to provide high quality nursing care. They will work to use their specialties for patient care in inter-professional care teams.
Medical Sciences	The College of Medical Sciences aims to educate students about responsibility and mission as health professionals and train fundamental knowledge and skills in medical sciences for health and medical care on a global scale. They will promote research and education and contribute to developing new technologies necessary for diagnosis and treatment.

(Main Field of Study)

**Article 2:** Main fields set forth in the provisions of Article 25, paragraph (1) of The Undergraduate Regulations shall be as follows.

Colleges	Main Fields
Medicine	M.D. Course, Medical Scientist Course
Nursing	Nursing Course
Medical Sciences	Medical Science Course, International Medical Science Course

(Completion of Courses, etc.)

**Article 3:** Classes and the number of credits, etc. required for graduation requirements from *Major Subjects*, *Foundation Subjects for Major*, and *Non-Major Subjects* for each main field for the School of Medicine and Medical Sciences shall be as described in the Supplementary Table No.1.

(Class Selection, etc)

**Article 4:** Classes to be completed and the number of credits to be earned as for the requirement to take classes from *Major Subjects* shall be as described in the following Supplementary Table No. 2 (with the exception of the School of Nursing and School of Medical Sciences).

(Maximum Limit for Course Registration)

**Article 5:** Registration is limited to 45 or less credits for classes set forth in the provisions of Article 33, paragraph (1) of The Undergraduate Regulations.

2 The limitation in the previous paragraph does not include classes required for obtaining teacher's certificate.

3 When the requirements stated in the following table are met, up to 55 credits may be registered for classes set forth in the provisions of Article 33, paragraph (2) of The Undergraduate Regulations.

Colleges	Requirements	Credits
Medicine	(1) The number of credits for compulsory classes acquired in the previous academic year is greater than or equal to 40 credits, of which greater than or equal to 60 per cent are either A <sup>+</sup> or A. (2) Exceptional circumstances are accepted by the program chair.	55 Credits
Nursing	(1) The number of credits for compulsory classes acquired in the previous academic year is greater than or equal to 40 credits, of which greater than or equal to 60 per cent are either A <sup>+</sup> or A. (2) Exceptional circumstances are accepted by the program chair.	55 Credits

Medical Sciences	(1) The number of credits for compulsory classes acquired in the previous academic year is greater than or equal to 40 credits, of which greater than or equal to 60 per cent are either A <sup>+</sup> or A. (2) Exceptional circumstances are accepted by the program chair.	55 Credits
------------------	---	------------

(Grade Evaluation)

**Article 6:** Grade mark of either “pass” or “fail” should be assigned for "First Year Seminar," "Invitation to Arts and Sciences," "Japan-Expert First Year Seminar," and "Career Design in Medical Science," as stated in the provisions of Article 35, paragraph (3) of The Undergraduate Regulations.

2 Classes in the following table shall be excluded from GPA grading in semester and cumulative GPA of the GPA system of the school.

Colleges	Classes to be excluded from GPA grading in the semester and cumulative GPA
Medicine	Among General Foundation Subjects—Specific Foundation Subjects—Core Electives, Major Subjects and Foundation Subjects for Major offered by other School and Colleges.
Nursing	Not applicable
Medical Sciences	Not applicable

(Miscellaneous Regulations)

**Article 7:** In addition to the prescribed in these specific regulations, regarding the selection period for main field, selection and submission period for graduation research, and other necessary matters for the completion of classes in the relevant College, the Dean of College shall determine and notify students throughout the university after consultation with the Education Council.

Supplementary Provisions

These Specific Regulations shall be implemented from April 1, 2007.

Supplementary Provisions

These Specific Regulations shall be implemented from April 1, 2011.

Supplementary Provisions

These Specific Regulations shall be implemented from April 1, 2012.

Supplementary Provisions

These Specific Regulations shall be implemented from April 1, 2022.

**(5) Detailed University Regulations Concerning the Purposes of Human Resource Development, etc. of the Bachelor's Program in Global Issues**

**Detailed University Regulations, No. 17 of October 19, 2017**

Revised: Detailed University Regulations No.10 of 2018

Detailed University Regulations No.18 of 2018

Detailed University Regulations No.4 of 2020

Detailed University Regulations No.12 of 2021

Detailed University Regulations No.1 of 2022

**Purpose**

**Article 1** The purpose of these Detailed University Regulations shall be to provide for necessary matters concerning admission, educational methodology, graduation and other matters, etc. necessary for the attendance at school of students in the Bachelor's Program in Global Issues (hereinafter referred to as the "Degree Program") provided for in Article 46, paragraph 2 of the Regulations of the Basic Organization and Operation of the National University Corporation of the University of Tsukuba (University Regulations No. 1 of 2004), in addition to what is provided for in the University of Tsukuba School Regulations (University Regulations No. 10 of 2004; hereinafter referred to as "School Regulations").

**Treatment of Courses, etc. Already Taken by Mid-Course Entrants and Transferees from Other Schools or Colleges**

**Article 7** In accordance with provisions of Article 22 of the School Regulations, the treatment of

courses already taken and the number of credits already earned by students as well as the number of years of enrollment required and the maximum duration of enrollment shall be determined according to the treatment of mid-course entry into the Degree Program and the treatment of transfer from other schools and colleges in the Degree Program.

**Curriculum Design Policy**

**Article 8** The Degree Program shall a curriculum where students will acquire comprehensive knowledge with the clear objective of investigating global issues, adopt an active stance in autonomously gathering and analyzing information necessary for solving problems, and develop global negotiating skills and management expertise.

**Curriculum Design, etc.**

**Article 9** Courses, the number of credits, and methods of taking classes in the Degree Program shall be prescribed in the curriculum design, etc. of the Degree Program (hereinafter referred to as the "Curriculum Design, etc.").

**Major Field**

**Article 10** The major field as prescribed in Article 25 of the School Regulations shall be as indicated in the following table:

Degree Program	Major Field
Bachelor’s Program in Global Issues	Interdisciplinary

**Degree-Granting Policy**

**Article 11** A Bachelor's Degree shall be conferred on students who are enrolled for the prescribed period and who earned the prescribed number of units.

2. A student’s achievement of each of the following items shall serve as a goal for graduating from the Degree Program:

- (1) Acquisition of broad knowledge that enables a broad perspective of global issues from the standpoint of the integration of liberal arts and sciences.
- (2) Acquisition of systematic specialized knowledge in global issues, acquisition of the ability to comprehensively analyze from diverse perspectives and to tackle solutions to problems with creative ingenuity.
- (3) Possession of flexible communication skills to listen carefully to others' opinions while asserting one’s own opinions logically and persuasively in global society, demonstration of positive leadership in different fields and different cultural environments, and acquisition of skills that enable contributions to society.
- (4) Acquisition of high ethical values in global society and ability to understand diversity.

**Methods of Taking Classes, etc.**

**Article 12** The subjects and number of credits required for graduation for each of the major subjects, foundation subjects for the major, and general foundation subjects according to the major field in the Degree Program provided for in Article 39 of the School Regulations shall be as stated in the appended Table.

**Upper Limit on Registration for Subjects**

**Article 13** The upper limit on subjects for which students may register during an academic year shall be 45 credits as prescribed in Article 33, paragraph 1 of the School Regulations. However,

intensive courses held during the summer, winter and spring break periods shall be excluded.

2. The requirements and number of credits in cases where a student is allowed to register for subjects beyond the upper limit as prescribed in Article 33, paragraph 2 of the School Regulations shall be as indicated in the following table:

Degree Program	Requirements	No. of Credits
Bachelor's Program in Global Issues	<p>(1) In the previous academic year, the student has earned at least 40 credits (20 credits in the first year) of the total credits required for graduation, and achieved grades of A+ or A for at least 80% of those credits.</p> <p>(2) The student is deemed to have special circumstances by the Degree Program Leader.</p>	55 credits

### Degree Conferral

**Article 14** The University shall confer a Bachelor of Arts and Science degree on students who fulfill graduation requirements for the Degree Program provided for in Article 12.

### Early Graduation

**Article 15** Students eligible for early graduation and the graduation standards as prescribed in Article 40 of the School Regulations shall be as indicated in the following table:

Degree Program	Eligible Students	Graduation Standards
Bachelor's Program in Global Issues	<p>(1) Students who earn at least 100 credits of the total credits required for graduation by the end of the fall semester of the third year and who achieve grades of A+ or A for at least 50% of those credits</p> <p>(2) Students who are expected to fulfill all graduation requirements by the end of the fall semester of the fourth year</p>	<p>(1) Fulfillment of graduation requirements for the Degree Program</p> <p>(2) Graduation research content recognized as being particularly outstanding</p>

### Organizational Training, etc. for Improving Educational Content, etc.

**Article 16** At faculty development (FD) and staff development (SD) seminars, teaching staff participating in the Degree Program shall exchange opinions and engage in discussion in regard to the purposes of human resources development, the curriculum policy, educational guidance methods, academic assessment, etc. in the Degree Program, and shall engage in the delivery of education with a common understanding.

2. Faculty and staff who participate in the Degree Program shall build cooperative relations among faculty and staff involved in the Degree Program, and shall further enhance activities for guiding students.

### Treatment of Credits including Graduation Thesis Preparation, etc.

**Article 17** In consideration of guidance received and study, etc. undertaken through courses in regard to the preparation, etc. of the graduation thesis, the number of credits granted to students for such preparation etc. shall be six credits.

## **Final Exams**

**Article 18** In principle, final exams shall be conducted during the end of final exam period prescribed in the school year calendar; provided, however, that results, etc. of ordinary study may be substituted for the results of exams for courses prescribed in the preceding article.

## **Grading**

**Article 19** The courses that may use pass (P) or fail (F) as grade marks as prescribed in Article 35, paragraph 3 of the School Regulations shall be *First Year Seminar* and *Invitation to Arts and Sciences*.

2. Courses excluded from the semester GPA and cumulative GPA of schools in the GPA system shall not be specified.

## **Miscellaneous Provisions**

**Article 20** In addition to matters prescribed in these Detailed University Regulations, the time for selection of the major field of study, time for applying for early graduation, time for selecting and submitting graduation research, and other necessary matters concerning the study of courses in the Degree Program shall be determined by the Degree Program Leader through discussion of the Degree Program Education Council and officially announced within the University.

## **Supplementary Provisions**

These Detailed University Regulations shall be implemented from October 19, 2017 and shall be applied from October 1 of said year.

### **Supplementary Provisions (Detailed University Regulations, No.10 of March 29, 2018)**

1. These Detailed University Regulations shall be implemented from April 1, 2018.
2. The appended Table applied to students who were admitted to the University prior to the implementation of these Regulations shall be in accordance with the previous provisions.

### **Supplementary Provisions (Detailed University Regulations, No.18 of November 28, 2018)**

1. These Detailed University Regulations shall be implemented from April 1, 2019.
2. The appended Table applied to students who were admitted to the University prior to the implementation of these Regulations shall be in accordance with the previous provisions.

### **Supplementary Provisions (Detailed University Regulations, No.4 of February 6, 2020)**

1. These Detailed University Regulations shall be implemented from April 1, 2020.
2. The appended Table applied to students who were admitted to the University prior to the implementation of these Regulations shall be in accordance with the previous provisions.

### **Supplementary Provisions (Detailed University Regulations, No.12 of November 25, 2021)**

1. These Detailed University Regulations shall be implemented from November 25, 2021 and shall be applied from October 1 of said year.
2. The appended Table applied to students who were admitted to the University prior to the implementation of these Regulations shall be in accordance with the previous provisions.

### **Supplementary Provisions (Detailed University Regulations, No.1 of January 27, 2022)**

1. These Detailed University Regulations shall be implemented from April 1, 2022.
2. Article 19, paragraph 1 and the appended Table applied to students who were admitted to the University prior to the implementation of these Regulations shall be in accordance with the

previous provisions.

Notes: 1. The number of credits listed in this table refers to the minimum numerical value required for graduation.  
2. The double-counting of the same course is prohibited whether it is within the same subject category or across all subject categories.  
3. Courses for Multidisciplinary Subjects, Physical Education, Foreign Languages, Information Literacy and Art, shall be those that are specifically designated as such.

4. Courses designated by the Chair will be indicated separately and instructions will be given.  
5. In principle, credits taken and earned at International Christian University will be recognized as General Foundation Subjects.  
6. In case of taking a course conducted in Japanese, it is required to consult the Chair before the course registration. The Chair will decide whether credits given by the course will be counted as credits required for graduation or not.  
7. Graduation Research can be replaced for Long-Term Practical Training with approval by the Chair.  
8. In principle, international students shall take Japanese Language as a required foreign language.

### 3. University of Tsukuba Guidelines on the Implementation of Undergraduate Examination

March 1, 2006

Ruling by the Vice President for Education

Final Revision on October 22, 2020

(Purpose)

- 1 This ruling shall provide for necessary matters concerning the implementation of examinations for class subjects (hereinafter referred to as “examinations for subjects”) in the undergraduate program as outlined in the provisions of Articles 34 and 35 of the University of Tsukuba Undergraduate School Regulations (Corporate Regulations No. 10 of 2004, hereinafter referred to as the “Undergraduate Regulations”).

(Period of Examinations for Subjects)

- 2 Examinations for subjects, in principle, shall be implemented during the period of final examinations (means those held for a period of time during the semester; the same shall apply hereinafter).

(Methods of Examinations for Subjects)

- 3 Examinations for subjects shall comprise written, oral, practical, and other methods of examinations and are implemented by the instructor in charge of the relevant class (hereinafter referred to as the “instructor in charge”).

(Presentation of Student ID)

- 4 Students who take examinations for subjects (including credited auditors, the same shall apply hereinafter) shall place their student ID (personal ID for credited auditors) on the desk during the examination hours for subjects.

(Report on the Result of Examinations for Subjects)

- 5 The instructor in charge should report the result of the examinations for the subjects to the dean of the college or the head of the School of Integrative and Global Majors (hereinafter referred to as “dean, etc.”) that offers the class subject through the grade (hereinafter referred to as “grade”) in Paragraph 1, Article 35 of the Undergraduate Regulations within 2 weeks from the final day of the examination period in principle.

(Special Case of Evaluation)

- 6 With regard to the classes conducted for two semesters, the examinations for the subjects shall be administered in each semester, with the evaluation of the results, and a comprehensive evaluation shall be made during the last semester of the class.

(Make-Up Examinations)

- 7 Students who were unable to sit an examination due to illness or other unavoidable reasons, limited to the case where the dean of the school offering the class subject approves, may take a make-up examination.

(Procedures for Make-Up Examinations)

- 8 A student who wishes to take a make-up examination shall submit an application for the make-up examination in the appended form to the dean of the school offering the class subject through the head of the educational organization, etc. to which the student belongs within 2 weeks from the first day of the examination period for final examinations and within 2 days from the final day of the examination period for examinations for subjects related to the determination of graduation of the student expected to graduate.

(Deadlines for Completing Make-Up Examinations)

- 9 Deadlines for completing make-up examinations shall be as follows: by the second week of the fall semester following the final examinations in the spring semester, by March 25 for the final examinations in fall semester, and within one week of the final examination period for examinations for subjects related to the determination of graduation of the students expected to graduate.

(Report on the Make-Up Examination Result)

10 The instructors in charge shall report the result of the make-up examination using grades to the dean of the school offering the relevant class within one week of the examination period for the spring, by March 25 for the fall semester, and within two days after the make-up examination period to judge if the students will graduate.

(Notification of the Grades)

11 Students shall be notified of the results of examinations for subjects on the date and time designated in advance.

(Evaluation Criteria for the Grades)

12 The evaluation criteria for the grades to be used for evaluation of the result of examinations of subjects are those provided for in the Appended Table.

(Misconduct)

13 In case a student committed misconduct during an examination for subjects, after consultation with the College Faculty Meeting and School Steering Committee for the School of Humanities and Culture, School of Social and International Studies, School of Human Sciences, School of Life and Environmental Sciences, School of Science and Engineering, School of Informatics, or School of Medicine and Medical Sciences, the School Faculty Meeting for the School of Health and Physical Education and School of Art and Design, the School of Integrative and Global Majors Faculty Meeting for the School of Integrative and Global Majors, and the School of Comprehensive Studies Steering Committee for the School of Comprehensive Studies (hereinafter referred to as the “faculty meeting, etc.” in Paragraph 5), the head of the educational organization, etc. to which the student belongs shall take any of the following measures.

(1) Invalidation of the examination pertaining to the class subject

(2) Invalidation of the examination pertaining to all class subjects in the semester for which the class subject is offered

14 With regard to the misconduct prescribed in the preceding paragraph, the university shall take disciplinary measures as outlined in the provisions of Article 60 of The Undergraduate Regulations, in addition to the disciplinary measures prescribed in the preceding paragraph.

(Miscellaneous Provisions)

15 In addition to this ruling, any necessary matters relating to examinations for subjects shall be prescribed at the faculty meeting, etc., if necessary.

Notes

This ruling shall be implemented from March 1, 2006.

Notes

This ruling shall be implemented from April 1, 2007; provided, however, that for students admitted to the University of Tsukuba prior to the revision of this ruling, notwithstanding the partial revisions of the said ruling, the provisions then in force shall remain applicable.

Notes

This ruling shall be implemented from April 1, 2011; provided, however, that for the implementation of the German proficiency examination to students admitted to the University of Tsukuba prior to the revision of this ruling, notwithstanding the partial revisions of the said ruling, the provisions then in force shall remain applicable.

Notes

This ruling shall be implemented from April 1, 2013.

Notes

This ruling shall be implemented from April 1, 2016.

Notes

This ruling shall be implemented from April 1, 2021.

Appended Table (related to Paragraph 12)

Appended Form No. 1 (Omitted)

#### 4. Implementation Guidelines for the GPA System of the University of Tsukuba (Undergraduate)

July 17, 2012  
Ruling by the Council of Undergraduate Education

Revised: March 17, 2015

February 16, 2016

October 22, 2020

##### (Purpose)

- 1 This ruling further substantiates the educational quality assurance set by the Tsukuba Standard. The purpose is to contribute to appropriate study guidance in addition to reinforcing students' desires to study in undergraduate degree programs. This will be achieved by establishing a system that calculates grade point average (the average value of grades in courses; GPA) at the University of Tsukuba (hereinafter referred to as the "University").

##### (GP)

- 2 The grade point (numerical value granted through evaluation; GP) corresponding to the grade of performance as provided in Article 35 of the University of Tsukuba Undergraduate School Regulations (Corporation Regulations No. 10 of 2004) and University of Tsukuba Undergraduate Examination Implementation Guidelines (Ruling of the Vice President for Education of March 1, 2006) is as listed in the following table.

Grade	GP (Grade Point)	Evaluation criteria	Reference approximate conversion
A+	4.3	Achieved the goal with a very excellent grade	More than 89 points
A	4	Achieved the goal with an excellent grade	80–89 points
B	3	Achieved the goal	70–79 points
C	2	Achieved the minimum goal	60–69 points
D	O	Did not achieve the goal	Less than 60 points
P	—	Pass	—
F	—	Fail	—

##### (Types of GPA and Calculation Methods)

- 3 The types of GPA shall be the GPA that indicates the stage and outcome of achievement in each semester (hereinafter referred to as "Semester GPA") and the GPA that indicates the stage and outcome of achievement in the entire enrollment period (hereinafter referred to as "Cumulative GPA").
- 4 The calculated values shall be rounded off to two decimal places. The calculating formulas for Semester

GPA and Cumulative GPA shall include those listed below.

(1) Calculation method of Semester GPA

NC registered in the relevant semester with

$[(\text{NC with A+}) \times 4.3] + [(\text{NC with A}) \times 4] + [(\text{NC with B}) \times 3] + [(\text{NC with C}) \times 2] \div \text{Total NC attempted} = \text{Semester GPA}$

(2) Calculation method of Cumulative GPA

NC registered in the entire enrollment period with

$[(\text{NC with A+}) \times 4.3] + [(\text{NC with A}) \times 4] + [(\text{NC with B}) \times 3] + [(\text{NC with C}) \times 2] \div \text{Total NC attempted} = \text{Cumulative GPA}$

**(Target Subjects for GPA)**

5 The target subjects for GPA shall be class subjects pertaining to graduation requirements prescribed in the Detailed Regulations for Completion of Educational Organizations.

6 Exceptions to the aforementioned rule shall be the following subjects, which will be excluded from the Semester and Cumulative GPAs.

- (i) Subjects earned at a different university and deemed as credits earned at the University
- (ii) Subjects assessed "P" or "F"
- (iii) Subjects that a dean designates upon request from a chair

7 Notwithstanding the provisions of the preceding two paragraphs, for the School of Comprehensive Studies, class subjects other than class subjects in item (i)

**(Rigorous Assessment of Academic Achievement)**

8 The dean, chairman of the expert committee of common subjects established in the committee of common subjects of schools in the Transferable Skills Education Promotion Committee, etc., shall determine and disclose the goal of distribution related to performance evaluation in the college concerned, common subjects concerned, etc., in advance.

**(Academic Achievement Report and Transcript)**

9 The academic achievement report of each semester shall contain Semester GPA and Cumulative GPA.

10 The transcript shall specify the calculation methods of GPA, etc.

**(Miscellaneous Provisions)**

11 In addition to this ruling, any necessary matters related to the implementation of GPA shall be separately prescribed by the Vice President (in charge of education) upon deliberation with the Education Council of the School.

**Note**

This ruling shall be implemented from April 1, 2013, and shall be applied to the students admitted in and after 2013.

**Note (March 17, 2015)**

This ruling shall be implemented from April 1, 2015.

**Note (February 16, 2016)**

This ruling shall be implemented from April 1, 2016.

**Note (October 22, 2020)**

This ruling shall be implemented from April 1, 2021.

## 5 Q and A on the GPA System for Students

March 2016

[The initial GPA system outline]

- GPA shall be indicated in the transcript, etc., for the undergraduate students admitted in and after 2013.
- Grade A shall be divided into A<sup>+</sup> and A, and grades shall be indicated with a 5-grade evaluation, A<sup>+</sup>, A, B, C, and D.
- Subjects given up shall be assessed D or F.

[Changes from the 2016 academic year]

GP (Grade Point) shall be revised as follows from April 1, 2016.

Grade	A+	A	B	C	D	P	F
New GP	<b>4.3</b>	<b>4</b>	<b>3</b>	<b>2</b>	<b>0</b>	—	—
Old GP	4	3	2	1	0	—	—

- New GP will be applicable to all the undergraduate students enrolled in and after 2013.
- Revision of GPA will be retroactively effective to the past. The “Semester GPA” and “Cumulative GPA” until AY 2015, which have already been calculated so far, will be recalculated based on the new system.
- The GPA indicated in Grade inquiry screen at TWINS, Certificate of Academic record and Notification of grades for parents will be the recalculated results based on the new system after April 1, 2016.
- The old GP system was used to calculate the GPA on the Notification of grades for fall semester in AY 2015; however, the GPA grades displayed at TWINS will be recalculated based on the new system from April 2016. New Notification of grades for 2016 spring semester will be sent to the parents by explaining this new GPA system (September 2016).

Q1: What is GPA?

A1: It refers to grade point average, one of the evaluation methods for students' achievements in the U.S. Each subject shall be graded with multiple steps for evaluation, and each grade shall be given. GPA is the average point of these grade points.

If there are more “A+s” or “As” and fewer “Cs” or “Ds,” then the value of the GPA becomes big (good). Giving up subjects means to increase the number of “Ds,” and the value of the GPA becomes small (bad). Therefore, obtaining good points for the registered subjects is

essential.

Q2: What is the purpose of introducing the GPA system?

A2: Specifying the situation of academic achievement enables students to make the registration plan best appropriate for them. It ensures the educational quality assurance set by Tsukuba Standard.

Q3: When will the GPA system start?

A3: The GPA system will be applied to the students admitted in and after 2013.

GPA is not to be calculated or described for the students admitted before 2013. Time of introduction of GPA to the Graduate School is not decided yet.

Q4: Where can I find the GPA?

A4: You can confirm it on TWINS and Notification of grades for parents along with the grades.

Q5: Is there any change in the assessment standards of academic achievement?

A5: Yes. The grades and standards of academic achievement will be changed from 2013, as indicated in the chart below. In the Undergraduate and Graduate School, the assessment of academic achievement will be conducted with a 5-grade evaluation.

A<sup>+</sup>, A, B, C, and P are passing grades, and credits are to be given. D and F are failing grades, and credits are not to be given. Until 2012, when students stop attending classes and give up subjects, TWINS shows “—” instead of “D”; however, from 2013, when students give up subjects, they fail (D or F) for whatever reasons.

Grade	Grade point	Evaluation criteria	Reference (approximate conversion)
A+	4.3	Achieved the goal with a very excellent grade	More than 90 points
A	4	Achieved the goal with an excellent grade	80–90 points
B	3	Achieved the goal	70–79 points
C	2	Achieved the minimum goal	60–69 points
D	0	Did not achieve the goal	Less than 60 points
P	—	Pass	—
F	—	Fail	—

Q6: Is it possible to cancel the course registration?

A6: It is possible to cancel the course registration on TWINS within the course registration period. After the period, it cannot be canceled. In case of any unavoidable grounds, please submit the Request for the Change of Registered Subject to the dean of the school.

Q7: Is there any effect of failing the registered subject?

A7: For the students admitted before 2013, failed subjects have not been shown and will not be indicated in the transcript, etc., so the fact is not open to a third party.

For the students admitted in and after 2013, even though the failed subjects will not be indicated in the transcript like before, GPA might reveal failed subjects (Failed subjects will include the denominator of GPA calculation).

Q8: What are the target subjects for GPA calculation?

A8: Target subjects include subjects relating to the graduation requirements set in the Detailed Undergraduate Registration Regulations. Even if the subjects are included in the graduation requirements, subjects earned in the other university and certified by the University or subjects assessed “P” or “F” are to be excluded. In addition to these, if more subjects are to be excluded, they shall be specified in the Detailed School Registration Regulations for each school and college.

Q9: What are the calculation methods for GPA?

A9: GPA shall be calculated using the target subjects for GPA. “Semester GPA” is the index that shows the outcome of academic achievement in the relevant semester being calculated with GPs of the target subjects at the basic point of time (on the designated date). “Cumulative GPA”

is the index that shows the outcome of academic achievement in the entire enrollment period since the entrance being calculated with GPs of all target subjects since the entrance.

The calculation formula is as follows:

$$\text{GPA} = \frac{\text{"NC with A}^+ \times 4.3 + \text{NC with A} \times 4 + \text{NC with B} \times 3 + \text{NC with C} \times 2 + \text{NC with D} \times 0\text{"}}{\text{"Number of all credits registered in the relevant semester"}}$$

\*NC = Number of Credits

GPA is calculated to two decimal places, rounding down the third decimal place.

For reference, an example of the simple calculation is indicated below. Semester GPA in the spring semester for a new student is the same value as Cumulative GPA. However, they may be different after the fall semester.

		A <sup>+</sup>	A	B	C	D	TTL	GPA
Spring semester	Number of credits	10	5	5	0	0	20	3.90
	GP	43	20	15	0	0	78	
Fall semester	Number of credits	5	0	0	5	10	20	1.57
	GP	21.5	0	0	10	0	31.5	
Cumulative value as of fall semester	Number of credits	15	5	5	5	10	40	2.73
	GP	64.5	20	15	10	0	109.5	

Q10: Is my GPA displayed on the Certificate of Academic Record?

A10: You can choose the presence or absence of GPA on the Certificate, and you have to mention every time when you apply for the certificate.

Q11: When is GPA calculated?

A11: Semester GPA and Cumulative GPA shall be calculated on the designated date right after the deadline for the input of grades for Spring C and Fall C. In case of any change in the grades after the aforementioned date, it will not affect the Semester GPA; however, Cumulative GPA for the next time will be calculated based on the changed grades.

Q12: Are there any influences/effects on GPA in case any subject is ungraded?

A12: In such a case, those subjects will not be included in GPA calculation; however, when the grading is done, it will be handled in the same way as in the previous section.

Q13: Multidisciplinary Subjects and Physical Education are classified as second choice due to the restriction of registration. Are these the target subjects for GPA calculation?

A13: Yes, these are target subjects for GPA calculation. There is no association between closed classes and the assessment of academic achievement.

Q14: Are subjects held by other School/College targets for the GPA calculation?

A14: In principle, all subjects that are targets for the graduation requirements are the targets for GPA calculation. Subjects not included in the target subjects for GPA calculation are specified in the Detailed School Registration Regulations.

Q15: Are the subjects related to qualification targets for the GPA calculation?

A15: If a subject is offered for qualification acquisition, included in the graduation requirements, and not excluded from the target subjects for GPA calculation, it is a target for GPA calculation.

Q16: Do grades earned overseas or at other universities reflect in GPA?

A16: No, these cannot be included in GPA because the assessment standards of other universities may not be the same as those of the University of Tsukuba. The credits earned before admission to the University cannot be included either.

Q17: What will GPA be used for?

A17: It is assumed to be mainly used for study guidance.

Q18: In case the GPA does not reach a certain level, will an admonishment of leaving school be issued?

A18: We do not assume such a usage at the moment.

Q19: If I repeat a subject, which grade will be reflected in the GPA?

A19: Both grades will be targets for calculation. The number of repeated subjects will be added to the denominator.
