	Regarding the OS, Windows is used by many companies, and there is a tendency that many students choose devices equipped with Windows. On the
	other hand, in terms of using open source software used in the field of
College of Biological Sciences	research, terminals equipped with Linux or UNIX-based macOS are often
	preferable. For those who want to deepen their studies in information science
	at university, we recommend that you consider the latter as well.
