

Curriculum Scheduling Support System Manual (For Students)

1. What is the Curriculum Scheduling Support System

The Curriculum Scheduling Support System (KdB) is a database that manages/publishes information regarding courses offered at the University of Tsukuba. As of now, it has been created in excel by each educational organization every academic year and distributed in print, however we are striving to integrate the databases to enhance the consistency and renewability of the data.

Figure 1 The Search Screen

1. To search for a course held at a given year, place your cursor over the “year” column and enter the year. However, since the initial value in the column will be the current year, usually this step is not necessary. There must be a year in that column and it cannot perform searches across multiple years.
2. Please select other search criteria with the pull-down menu. For instance, if you click on the “semester selection”, a pull-down list will be displayed and you can select the desired module (such as “Spring A”). For the requisite, headings that correspond to the subject list’s table of contents will be displayed hierarchically. If you click on the triangle on the right, the next hierarchy of headings will be displayed. When you want to cancel a search criterion, click on the “Clear” button at the lower right of the screen.
3. Click on the “Search” button.
