

【Warning】 Beware of Traffic Accidents and Bicycle Thefts!!

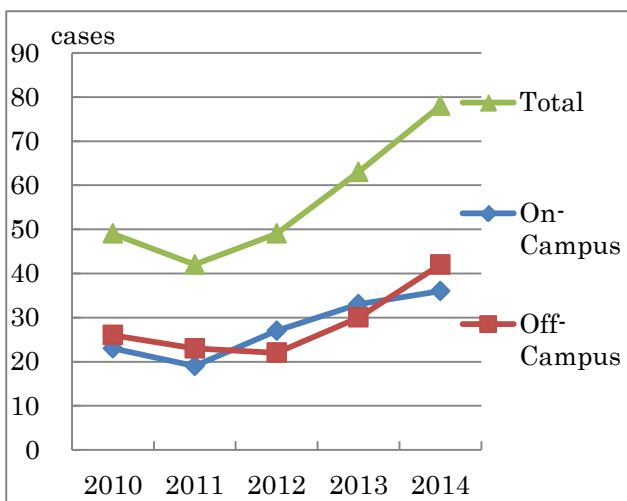

The graphs below show the total numbers of traffic accidents and incidents (thefts) which have been reported to the university in past five years (AY 2010 to 2014).

The number of each case has been rapidly increasing. All students should be careful by yourself to avoid an accident and theft.

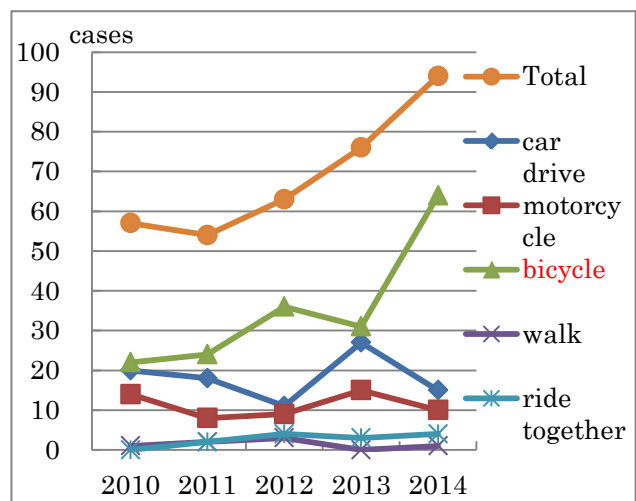

1. The situation of traffic accidents

The number of cases has tended to rise. Those involving bicycles rapidly increased in AY 2014. When cycling, observe traffic rules and take care not to have an accident. **Cycling on the right side, while using a device such as a smartphone or wearing earphones are violations of Road Traffic Law, and do not do such dangerous things.**

(1) The number of accidents

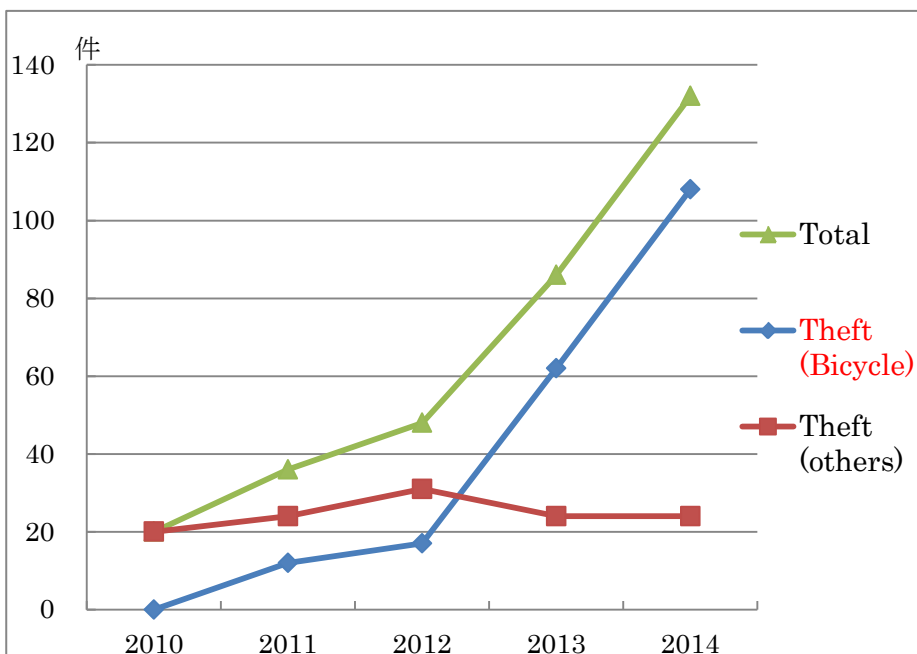

(2) The means of transport

2. The situation of crimes (theft)

The number of bike thefts is rapidly increasing. **Regardless of on-campus or off-campus, please park your bicycle properly and keep in mind to use two locks even if you leave it for just a minute.**

Hazard map
